About Tessian

Tessian's mission is to secure the human layer. Using machine learning technology, Tessian automatically stops data breaches and security threats caused by human error – like data exfiltration, accidental data loss, business email compromise and phishing attacks – with minimal disruption to employees' workflow. As a result, employees are empowered to do their best work, without security getting in their way. Founded in 2013, Tessian is backed by renowned investors like Sequoia, Accel, March Capital, and Balderton and has offices in San Francisco and London.

Biography: Tim Sadler

Tim is the Chief Executive Officer and co-founder of Human Layer Security company Tessian. Tim and his co-founders started Tessian in 2013 and has since grown the company to over 170 employees and raised over \$135m from leading venture capital funds. Tim has been listed on the Forbes 30 Under 30 list in technology.

Biography: Ed Bishop

Ed is the Chief Technology Officer and co-founder of Tessian, the Human Layer Security platform. He is responsible for leading the engineering, product and data science teams. Following a career in M&A, Ed co-founded the company and built the early platform which uses machine learning to prevent threats like phishing attacks, data exfiltration and accidental data loss on email.
